

**THE PSORA : SPASMS AND CONGESTION**

**PSORA**

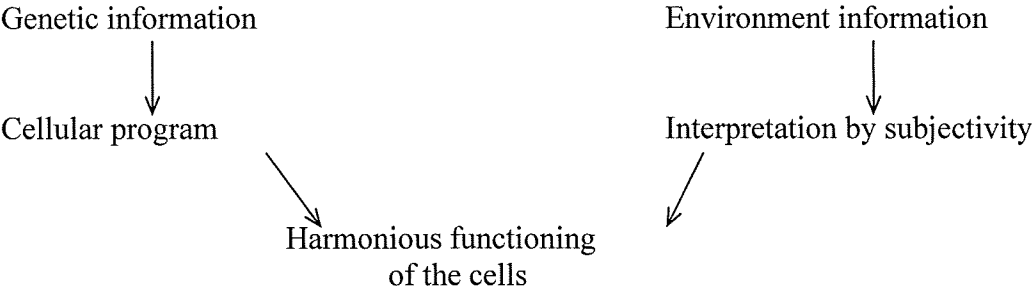

**APPEARANCE OF NEW SYMPTOMS**  
**MORBID RECURRENCE AND ALTERNATION**  
**IMPORTANCE OF ELIMINATION WHICH >**

→ **CHRONICITY**

**1/ Law of Balance + + + +**

**2/ All the diseases result from disharmony**

**ENSEMBLE OF ILLNESSES FROM IMBALANCE OF ENTRIES AND EXITS**

**MAIN SYMPTOMS + + + +**

**1/ Appearance of different symptoms with**

- morbid alternations

- tendency to chronicity

**2 / Key organ : cutaneous emunctory**

**3/ > by elimination, < suppression**

**4/ Constant digestive effects**

- transit disorders
- parasitosis
- appetite often decreased (Antimonium crudum, Psorinum, Lycopodium, Sulfur)

**5/ Thermoregulation disorders**

- sensitive to cold
- intolerant to heat

**6/ Tendency to asthenia**

**7/ Ill smelling elimination**

- skin, mucosa with itching
- respiratory, genitourinary, intestine

**ETIOLOGY**

Notion of | depth of psora  
          | centrifugal power of psora

**1/ Material entries**

**2/ Immaterial entries**

**3/ Blocked emunctories**

**PSORIC EVOLUTION**

**1/ Centrifugal phase**

**2/ Asthenic phase**

**3/ Centripetal decomposition phase**

**ALTERNATION OF SYMPTOMS + INTENSITY OF ELIMINATION**

**CHRONICITY**  
**SCLEROSIS**  
**EXHAUSTION**  
**< BY SUPPRESSION**

**Typology : digestive hypoendocrine**

**Skin**

**THE CHILD**

Hypothyroidism → | spasmodic states  
hypocalcemia

→ RESTLESS SLEEP

Lymphatic circulation | colds  
hepatic congestion  
lungs

**CALCAREA CARBONICA → LYCOPODIUM → SULFUR**

**THE ADOLESCENT**

- Intellectual value, schooling → balanced  
- Affected organs | digestive  
lungs  
skin  
ganglions  
mental → unbalanced

**THE ADULT**

- Hypersurrealism  
- Stiffness

**LIVER      LUNGS      THROAT      LYMPHATIC      VEINS**

**SCLEROSIS** → | high blood pressure  
Vascular accidents

**CLASSICAL DEPOSITS** → cysts, fibroma

**GENITAL**

- Cryptorchidia
- Puberty
- Menses, menopause, sterility
- Allergy, asthma
- prostate
- Colibacillosis

# TREATMENT OF ACUTE RHINOPHARYNGITIS

## I - PROMINENT COUGH

### 1/ *Coccus cacti*

- Thick, viscid, postnasal mucous
- Whooping cough by laryngeal tickling
- < night, awakens patient at 11.30 p.m. / 6.00 a.m.  
warmth, brushing teeth
- > open air, cold drinks

### 2/ *Corallium rubrum* + + +

- Main remedy of adenoids
- Posterior catarrh
- Whooping cough, violent, spasmodic, suffocating, exhausting  
→ vomits abundant nasal mucous
- < during sleep, when waking up

### 3/ *Ipeca*

- Violent coryza with | intense sneezing  
nasal obstruction  
cough and vomiting  
bleeding

### 4/ *Rumex crispus*

- Extremely sensitive to cold air
- Posterior catarrh
- Constant tickling and dry cough
- < least cold air inhaled  
lying down at night  
pressure on throat pit

### 5/ *Drosera*

- Whooping cough → nausea and vomiting  
→ epistaxis

## II - PROMINENT RHINITIS

### 1/ Watery, acid, burning discharge

- *Allium cepa*

- Acid coryza / bland lachrymation
- Watery and acid drip
  - burns nose → excoriation
- Red itching eyes, frequent sneezing
- Hoarseness and spasmodic dry cough
- Otagia in children
  
- Arsenicum album
  - Burning pain alleviated by hot applications < 1 - 3 a.m.
  - Alternation
  
- Arsenicum iodatum + + + +
  - Thinness, adenoids, excoriating discharge
  - Hayfever | thick acid coryza
  - | intense sweating
  - Purulent otitis with much pain
  
- Mercurius
  - Thirst, sweat
  - Bad breath, tongue, smell, taste
  - Thick bloody pus, sinusitis
  
- Arum triphyllum
  - Very excoriating
  - Nasal obstruction
  - Patient scratches his nose all the time
    - bleeds with acute pain
  - Hoarseness when talking

## 2/ Bland non acrid discharge

- Euphrasia
  - Profuse acrid elimination
    - with profuse bland discharge < morning
  - Margins of lids red, swollen, burning
  - violent cough and coryza with abundant expectoration  
< morning
  
- Sabadilla
  - Sneezing in spasmodic paroxysms followed by lachrymation
  - Copious watery discharge
  - Dryness of fauces and throat with tickling in palate  
< smell of garlic, flowers, peaches  
cold and cold drinks  
> open air, warm food

- Pulsatilla + + + +
  - Dry mouth without thirst
  - Nose obstructed in the evening
  - Cough           | dry night  
                      | lose daytime
  - Yellow, thick, abundant mucous
  - Beginning and ending of discharges
  - Hepatic, lymphatic and venous disorders
  - < warm room    |
  - > open air       | + + + +

### 3/ Watery, burning acrid discharge + important nasal obstruction

- Ammonium carbonicum
  - Sniffles of infants (Hepar, Nux vomica Sambuccus, Sticta)
  - Bloody mucous from nose
  - < night, 3-4.00 a.m. (cannot sleep) with oppression, palpitations
- Arum triphyllum
- Sambuccus nigra
  - Nose completely obstructed
  - Croupy cough with sudden awakening at midnight
  - Profuse sweat before waking up
- Sticta pulmonaria
  - Violent coryza
  - Extreme dryness of nose
  - Frontal headache with pressure at the root of nose
    - > when discharge appears
  - Dry painful teasing cough
    - < night, lying down
    - with pain of frontal sinus
- Agraphis nutans
  - Obstruction by hypertrophy of adenoids
  - Extreme aptitude to catch cold by cold wind
  - Catarrhal deafness
- Sanguinarium nitricum
  - Nose polyp, hayfever, sinusitis, sneezing
  - Discharge       posterior : thick, yellow, mucopurulent  
                      anterior : watery, burning
  - < night
  - > warm applications

#### **4/ With pus**

Pulsatilla  
Kalium bichromicum  
Hepar sulfuricum  
Calcarea sulfurica  
Kalium bichromicum  
Hydrastis  
Mercurius

### **III - TREATMENT OF THE TERRAIN**

#### **1/ Psora**

- Prominent during infancy with :
  - morbid alternation
  - repeated attacks of elimination

#### **2/ Tuberculinism**

- Frequent, sudden and short attacks
- Always peaky

#### **3/ Luesia**

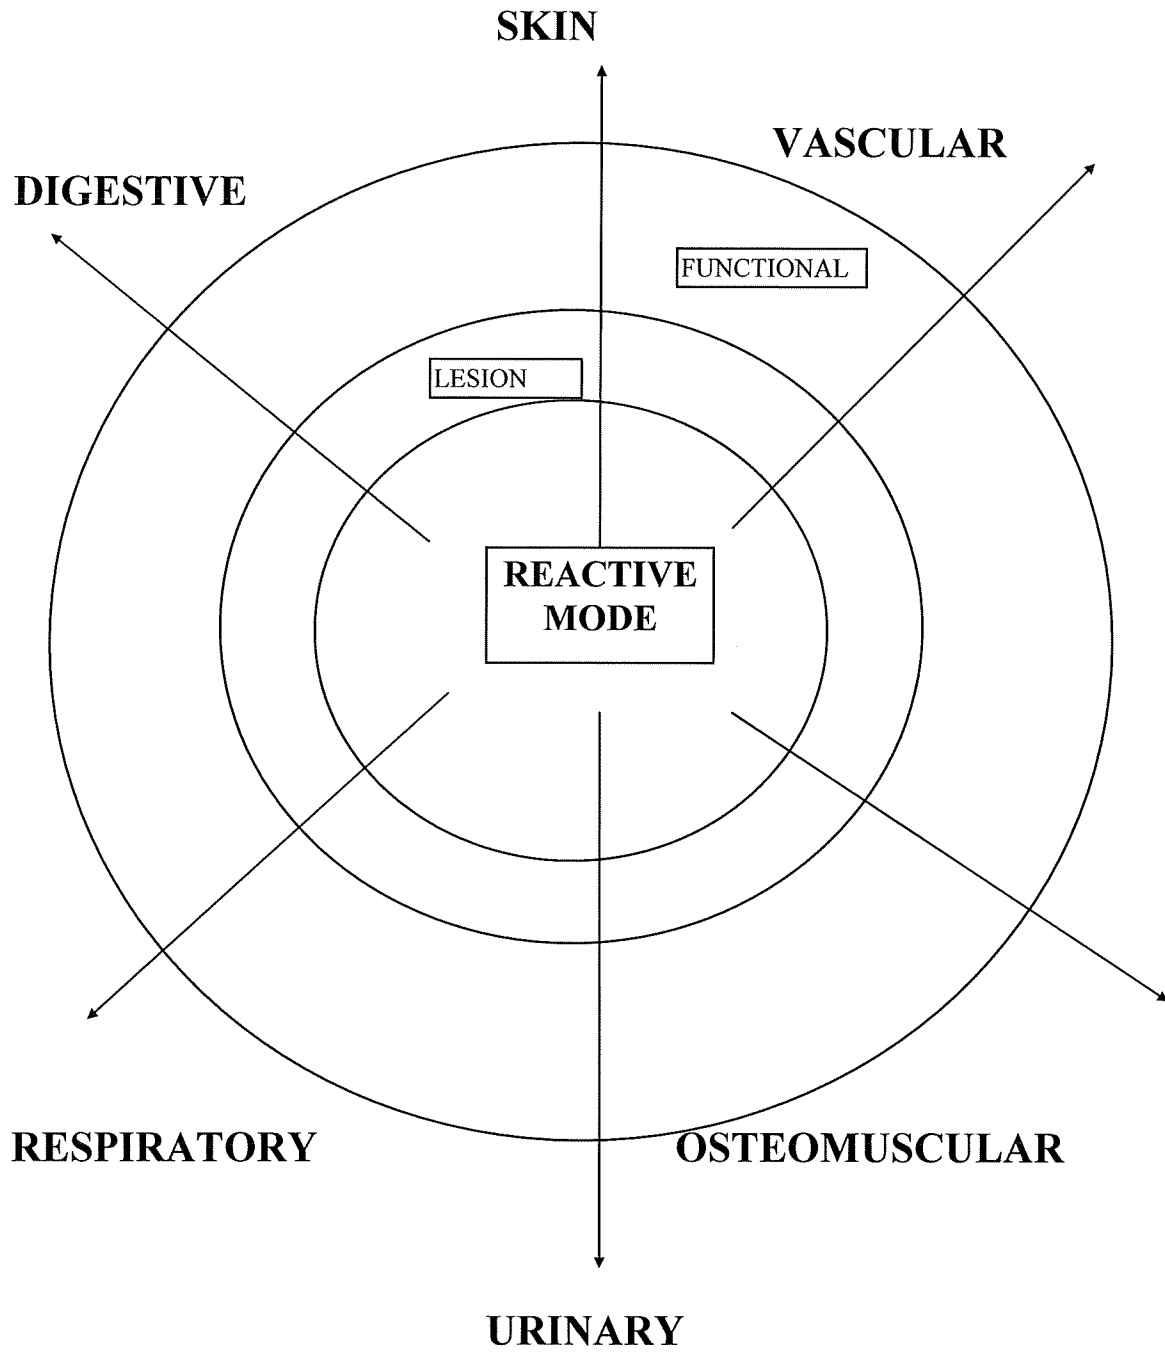

- Psora and tuberculinism prominent

#### **4/ Sycosis**

- Takes an active part in defense process
- Slow reaction to 

|  |  |                         |
|--|--|-------------------------|
|  |  | answer questions        |
|  |  | fight against infection |

**THE EMUNCTORIES**

# HOMEOPATHIC CONSULTATION : TONSILLITIS - OTITIS - SINUSITIS

## TONSILLITIS

### I - AT THE BEGINNING : red throat

#### 1/ Aconitum napellus

- Temperature quickly at the top level
- Mental trilogy
- Dryness with intense thirst for cold water
- Swollen tongue
- Pins and needles on lips, tip of tongue
- Bitter taste for anything except water

#### 2/ Apis mellifica

- High temperature without thirst, sweat, urination
- Throat pale red, swollen
- pale and translucent edema with soft palate and uvula  
—————> feeling of constriction (Belladonna, Lachesis)

#### 3/ Belladonna

- Sudden, paroxysmic, radiant, throbbing fever
- Dry, swollen, red, shiny tongue
- Intense thirst alternating with inability to swallow
- Spasmodic constriction of throat
- Exhaustion alternating with furious delirious

### II - MEMBRANES

#### 1/ Mercurius + + + +

- |                      |   |  |            |
|----------------------|---|--|------------|
| - Fever              | high<br>intense thirst<br>profuse sticky sweat  |  | > at night |
| - Mouth              | ptyalism : soapy, stringy<br>fetid metallic taste<br>tongue shows imprint of teeth<br>aphtae, ulcers<br>mapped tongue |  |            |
| - Tonsils            | membranes thick, gray<br>constant desire to swallow   |  |            |
| - Suppuration remedy |   |  |            |

slow to suppurate  
suppuration is too profuse  
always with glandular swelling

## 2/ Salts of mercury

- Cyanatus + + +
- Protoiodatus
- Biiodatus

## 3/ Phytolacca decandra + + + +

- Target organs            pharynx mucosa  
                                  mammary glands  
                                  ganglions  
                                  periosteum and bones

- Very severe sore throat            →            chronicity
- Dark red color
- Uvula large, dropsical, almost translucent (Kalium bich., Rhus tox.)
- Tonsils, uvula, back of throat covered with ash colored membranes
- Burning as from a red hot iron, with dryness
- Cannot drink lots of fluids (Belladonna)
- Constriction worse between deglutition
- Great remedy for dentition

## 4/ Pyrogenium - Hepar sulfur + + + +

- Septic states

*Careful with the dilution!!!!*

Pyrogenium    the bed feels hard  
                          great restlessness  
                          tongue clean, smooth as if varnished  
  fierce red, dry, cracked  
                          taste terribly fetid, pus like  
                          pulse rapid, out of proportion to fever

Hepar sulfur    sensation of sphincter, fish bone  
                          very sensitive to touch  
                          intolerant to pain, bad temper  
                          chronic hypertrophy

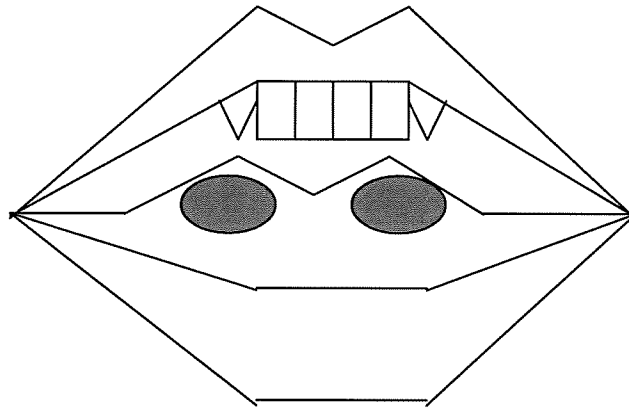

## 5/ Kalium bichromicum

- Similar to Mercurius but weakened
- Fat, chubby, short necked, blond children
- Oppression, suffocation wakes the patient up
- Tough, stringy mucous which adheres
- Drainage of lacunal tonsils (chronic : Silicea)

**ACONITUM  
APIS MELLIFICA  
BARYTA CARBONICA  
BELLADONNA  
CHAMOMILLA  
DULCAMARA  
LYCOPODIUM**

**CALCAREA SULFURICA  
HEPAR SULFUR  
GUAIAACUM  
MERCURIUS  
LACHESIS  
ECHINACEA**

**MERCURIUS DULCIS  
MERCURIUS PROTOIODATUS  
MURIATIC ACID  
SILICEA**

**MERCURIUS BIODATUM  
MERCURIUS CYANOTUS  
PHYTOLACCA**

## *ACUTE TONSILLITIS*

AMONIUM MURIATICUM

ARGENTUM NITRICUM

ARSENICUM IODATUM

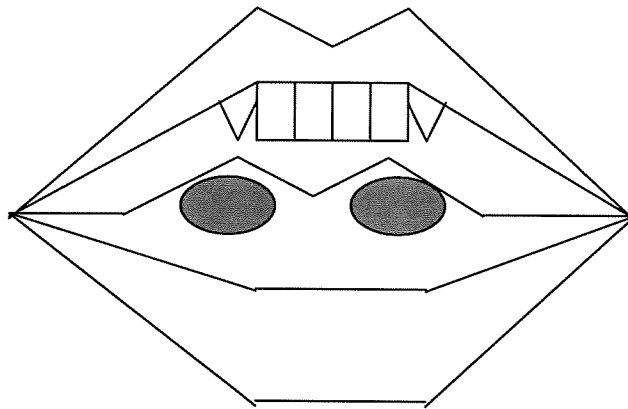

CONIUM MACULATUM

HEPAR SULFURICUM

KALIUM MURIATICUM
